

Corporate tours

- Pacific Northwest Natural Labs
- Honeywell
- CCI Ammunition
- Exotic Metals
- Schweitzer Engineering
- Framatome

Purchasing

- Ahead of time purchases: Form to fill out including specifications
 - o Directly email Ian who can directly spend on the account
- Reimbursement purchase: Submit the receipt after the purchase
 - o Can be difficult and reimbursement can take a long time

Ceramics for mug drop

- Earthenware
- Stoneware: Preferable ceramic
 - o Proper firing temperature
 - o Low CTE glaze (lower than the substrate amount)
 - o Slip casting (time consuming) or hand forming (fast)
 - Only enough time to do the hand forming for the 2024 competition.
 - Slip casting would take too long for the 2024 competition.
 - o Deflocculant to stop the clay from clumping together
- Porcelain

Mug design

- Avoid sharp edges and stress concentrations
- Possible 3D printing (asking Dr. Bose, consideration of cost)

Club funding

- Gift account for funding (easy to do)
- Selling ceramic slip cast shot glasses
- Yearly shirt design
 - o If donors/companies reach a certain donation amount (roughly \$500) their logo is printed on the year's shirt

Next steps for the mug drop

- Low fire clay (match with the furnace)
- Red and white glaze that matches the clay
